Work Experience

3io-dev / Tubesnag — Frontend Developer

April 2023 — Present

Tubesnag is a **Youtube video downloader** web Application.

• Currently working with a team of Eight(8) developers (including a product designer) to develop a web application called **Tubesnag** where users can download YouTube videos in any resolution just with a YouTube video URL.

Education

SQI College of ICT— Frontend Developer

Jan 2022 — Present

During the past one year,
I have been studying Frontend Web Development at **SQI College of ICT** .
I have gained expertise in web frameworks like HTML, CSS, Tailwind CSS, JavaScript, React JS and Vue js I am also proficient in GIT, GitHub, and Figma. I have completed projects in website optimization, dynamic website and interactive UI.
Improved my interpersonal and teamwork skills by working with cross-functional teams.

Recent Projects

Intellitools

2023 — Present

Intellitools is a website featuring a massive collection of **Ai tools**.

• I worked in conjunction with a product designer to create a web application, which included a wide range of Artificial Intelligence (AI) tools. We worked together to ensure that the final product was of the highest quality and most user-friendly.

Demo Code

Clevertalk

2023 — Present

Clevertalk is a **chatbot** built using OpenAI's API.

• Designed and developed a chatbot utilizing the open-ai GPT-3 API. This application allows users to interact and converse with a pre-trained model, gaining insights and responses based on textual or voice inputs. It is an effective approach to automated conversations.

Demo Code

TailUI

2023 — Present

TailUI is a library of free **Tailwind CSS templates** for quickly building responsive websites.

• Single-handedly designed and developed a web application that grants users access to a list of Tailwind CSS templates. Users can quickly and easily copy a template to their clipboard and instantly take advantage of it to improve their projects.
